8th RGNUL Sports and Entertainment Law Mediation Competition, 2026

8TH RGNUL SPORTS & ENTERTAINMENT LAW MEDIATION COMPETITION 2026

CLARIFICATIONS: ADVANCED ROUNDS

QUARTER-FINAL ROUND

Q. Is the alleged association between ExposedFrames and RivalEdge Entertainment supported by any verified evidence, or does it rest solely on the assertions made in the legal notice?

The alleged association is not supported by any independently verified evidence on record and appears to rest primarily on assertions made in the legal notice. It may therefore be treated as an unsubstantiated allegation raising potential concerns of bias.

Q. With respect to the statement of the former employee, is this statement supported by any evidence on record, or is it to be treated as a mere allegation?

The former employee's statement is not corroborated by any independent evidence on record, and is expressly disputed by GrindKing. It should be treated as a mere allegation with limited evidentiary value.

SEMI-FINAL ROUND

Q. To what extent does ARJ-7 incorporate identifiable personality traits or communication patterns of Anaar, beyond general gameplay strategy modelling?

ARJ-7 is a comprehensive AI replication of Anaar Rao's competitive identity, trained on the full spectrum of data inputs provided under the Agreement, including gameplay telemetry, voice communications, tactical patterns, reaction-time measurements, facial expression mapping, and behavioural analytics.

Q. With respect to Clause 1.4 ("Permitted Purpose") of the Agreement, is the use of the Al avatar competitive, or does the exhibition match against human players within the scope of the permitted purpose?

Whether the deployment of ARJ-7 in exhibition or professional matches against human players falls within this definition is a matter of contractual interpretation. The parties hold differing positions on this question. This point is left to the participants to address within the mediation proceedings.

Q. What is the current position of the usage of Avatar ARJ7 in professional matches? Is it used in exhibition matches only or professional player matches also? And is Avatar being ranked in the official list also or unofficial only?

ARJ-7 has participated in exhibition matches and has also been deployed in professional player matches, competing directly against professionals. With respect to rankings, ARJ-7 has not been ranked in any official league or tournament leaderboard. However, SportsZ, a widely recognised platform among gaming professionals, known for its expert-led performance assessments has independently ranked ARJ-7 highly alongside professional players based on its match performances. ARJ-7 being ranked above Anaar has contributed to ARJ-7's perception as a competitive entity. Informal fan-based ratings on community platforms further reinforce this.

FINAL ROUND

Q. Is there any clarification on the training data or safeguards used by DholuGen to prevent generation of real-world brand-identifiable structures?

DholuGen blocks the reproduction of 2D logos; however, 3D structures are generated using general architectural data rather than a specific brand-exclusion database.

Q. Are the "provocative captions" used by TunTun's PR team part of an automated engagement system or manually curated editorial content?

The captions follow a hybrid model; an algorithm suggests phrases based on viewer trends, but the final text is manually reviewed and approved by TunTun's editorial staff.
